The power beyond expectations

RFBDC8G9GA

BLOCK DOWN CONVERTER

IF Output 200MHz~800MHz
RF Input 8.85GHz~9.35GHz

Summary

RFBDC8G9GA down-converter unit uses the phase lock technology, and it uses the crystal oscillator with temperature compensating function as the referenced signal of PLL, what's more, it uses the low phase noise Analog Device ADF4107BRS as the frequency synthesizer chip of PLL. So the frequency of its inner part LO has a good stability in a wider temperature range.

RFBDC8G9GA Down-converter use two band pass filter inside so that It can give better out band rejection.
